

Which Files Should I Use?

Quick reference card. For full details, see [docs/data_usage_guide.md](#) (../docs/data_usage_guide.md).

I want to... → Use this file

I want to...	Use this file
Compare P0 vs P1 vs P2	baseline/production_v2/tables/descriptive_statistics.csv
Get publication-ready comparison table	baseline/tables/table1_baseline_comparison.csv
See how RT changes with fleet size	baseline/tables/exp2_pivot_rt.csv
Check statistical significance	baseline/production_v2/tables/anova_results.csv + posthoc_comparisons.csv
Get effect sizes	baseline/production_v2/tables/effect_sizes.csv
Analyze capacity sensitivity	analysis/capacity_comparison/full_comparison.csv
View allocation heatmaps	analysis/heatmaps/heatmap_K*_policyP0_spatial_cap*.png (use P0_spatial !)
Check CBD analysis	analysis/cbd_focused_comparison/comparison_table.csv
Verify simulator correctness	baseline/simulation/verification/*.json
See validation pilots	baseline/simulation/validation_pilot/*.json
Get raw simulation data	baseline/production_v2/simulation/all_results_raw.csv
Use publication figures	baseline/figures/pub_fig*.png
See allocation maps	baseline/production_v2/figures/allocation_map_K*.png
Compare distance metrics	analysis/distance_comparison/comparison_table.csv

Status Legend

Symbol	Meaning
 CURRENT	Safe to use for analysis and reporting
 LEGACY	Historical reference only — do not cite as current
 COMPARISON	Contains both current and legacy data for comparison

Folder Status at a Glance

Folder	Status	Notes
baseline/production_v2/	 SOURCE OF TRUTH	cap=2, spatial P0, 30 reps
baseline/simulation/	 Current	V&V pilots
baseline/tables/	 Current	Publication & experiment tables
baseline/figures/	 Current	pub_fig* for publications
analysis/capacity_comparison/	 Current	Full cap sweep
analysis/heatmaps/	 Current	Use P0_spatial for canonical P0
analysis/cbd_focused_comparison/	 Current	CBD experiment
analysis/distance_comparison/	 Current	Manhattan vs Haversine
analysis/maps/	 Current	K=40 allocation maps
analysis/simulation/	 Current	Production experiments & CBD experiment
archive/optimization/	 Legacy (cap=5)	Phase 3 historical
archive/	 Legacy	Audit reports, old figures/tables

Common Pitfalls

1. **Don't use** `archive/optimization/` **as current results** — it uses `cap=5`. Use `baseline/production_v2/` instead.
2. **In** `analysis/heatmaps/` **and** `analysis/capacity_comparison/`, files with `P0` (no `_spatial`) are the deprecated index-based P0. Use `P0_spatial` for the canonical baseline.
3. `capacity_sensitivity_heatmap.png` in `archive/figures/` has a data format issue — use `analysis/figures/capacity_sensitivity_heatmap_notebook.png` instead.
4. **Files ending in** `_notebook.csv` in `archive/tables/` are from older notebook runs, not the production pipeline.
